//

Globe-360 v2

X360 Dvd-drive
Universal Firmware Upgrader

INSTRUCTIONS

//

Firmware Bank0 <-Power-on the console through a normal pression of power button

Firmware Bank1 <- Power-on the console through EJECT button or power-on the console through a very-fast pression of power button.

If the Dual-Firmware Mode wasn't enabled under the application setting-up, the different pression of power button at power-on don't care.

Modchip Mode :

ENABLED-> FW0 or FW1 Led_status= **ON** <- Power-on the console through POWER or EJECT button

DISABLED-> ALL Led_status= **OFF** <- hold-down the Wireless-Sync button then Power-on the console through POWER button

NOTE:
Before to perform any kind of operation on your Original-Flash, make it a backup!!!
